

**CLEAN, HEALTHY AND
SUFFICIENT WATER NOW.
NATURALLY.**

**Your green voice
in the water board.**

**Clean, healthy and sufficient water? Naturally!
Water to enjoy, water for nature and water for
you. With a green policy and good cooperation
we will provide in clever water management for
people and nature.**

Vote Water Natuurlijk on march 15.

Our goals for Noorderzijlvest:

1. Restoration of biodiversity

More room for nature, eco-friendly land management, better possibilities for fish migration and prioritising nature in projects.

2. Natural water system

More room for water within a resilient natural water system. Retainment of water in urban and rural environments.

3. Clean, healthy and living water

We strive for better overall water quality. We help agriculture becoming more sustainable and we work together towards improvement.

4. Circular sanitation and operation

In 2030 we become climate neutral. We stop peat degradation and we will sanitize wastewater in a circular fashion.

5. Social and affordable

We take the financial capacity of all tax payers into account. We follow the polluter pays principle.
